ABOUT ME

Hi, my name is Jovan Ilić. I'm a Front-end Developer from Serbia with back-end experience and a passion for design. I have been consistently working on React based web apps for the past 6 years. I strive to write clean, reusable, well-documented, cross-browser, and optimized code while actively seeking opportunities to enhance my skills and introduce innovative solutions to the projects I work on.

SKILLS

Languages & Core Tech: HTML, CSS, SCSS, JavaScript, TypeScript.
Frameworks & Libraries: React, Next.js, Vite, Redux, SWR, TenStack Table/Query.
Back-end & Databases: Node.js, Express, SQL, Supabase.
Styling & UI: Figma, Tailwind, shadcn/ui.
Tools & Deployment: Git, Vercel, Netlify.

WORK EXPERIENCE

APR 2024 - PRESENT

Full-stack Developer
bont.ai - Next.js > Vite, TypeScript, Supabase, PostgreSQL, Tailwind, shadcn/ui, Figma, Vercel.

FEB 2022 - APR 2024

Front-end Developer
Compound Technologies - React, Express, Next.js, TypeScript, SCSS, Figma, Netlify/Vercel.

- FinTech Web3 startup that raised ~$700k - worked on the development of two of their apps.
- Lead a small team of 1 back-end engineer and 1 designer.
- Dabbled in back-end and UI&UX when needed as a helping hand or to speed up the development process.
- Worked on developing interesting features such as a custom Photoshop-like editor for customizing/combining NFTs, a custom on-site Web3 wallet integration system with custom options such as NFT video sequencing, UI for smart contract integrations, etc.

JAN 2020 - FEB 2022

Front-end Developer
Fiverr and Private Clients - React, Express, SCSS, Figma, Netlify.

- Freelanced on Fiver and for Private Clients making various websites.

PERSONAL PROJECTS

2023

Portfolio   🌐 www.jovand3v.com   ○ private
Representation of my work & experience via the web.

2023

PHERRA   🌐 www.pherra.vercel.app   ○ private
PHERRA is a full-stack e-commerce project with a custom-built CMS. PHERRA is hosted on Vercel and was built using: Next.js, TypeScript, SCSS, JWT, Prisma, Vercel Postgres Database, AWS S3 Bucket, and Figma.

2021

Keep-Track   🌐 www.keep-track.netlify.app   ○ private
KEEPTRACK is a front-end nutrition tracking project. It's hosted on Netlify and was built using: React, Redux, SCSS, chart.js, and Figma. This project was initially built for personal use only, but later I've decided to re-design it, brand it, and put it as one of my projects even if it was built in 2021.
